

David Mason

General Information

Qualifications

- NEBOSH Diploma in Occupational Health and Safety
- NEBOSH General Certificate
- HNC - Electrical and Control Engineering
- Level Five Diploma in Management

Memberships

- Chartered Member of the Institution of Occupational Safety and Health
- Member of the Chartered Management Institute

Biopic

- David is a Chartered Safety Practitioner who has spent the majority of his career in the UK nuclear industry. This has involved him working on a variety of sites in a number of roles, including operations, design, construction, engineering, research and development. He has a proven track record of designing and delivering safety solutions and initiatives that have won national safety awards. These have included behavioural safety workshops, national conferences, organisational learning processes, health and safety training, culture improvement workshops and safety management systems. David has an excellent understanding of the challenges involved with managing health and safety and matches this with a dynamic approach to his work.

Examples of Experience (Health and Safety)

Housing Association

- Carried out a review of contractor management activities, designed and implemented new procedures and processes and delivered IOSH Managing Safely courses to their departmental managers.

Major National Property Developer

- Designed and implemented the health and safety management systems for four business groups operating within the parent company – construction group, manufacturing workshops, head office and a city centre health and fitness centre.

Category One Nuclear Operations Facility

- Managed the Safety and Assurance team – Delivered several key operational safety case projects, implemented the Environmental Management System, designed and implemented the facilities behavioural safety training package, led the safety culture improvement workshops and wrote/implemented the facility safety improvement plan.

Nuclear Research and Development

- Safety Improvement Manager – Designed and implemented a wide range of safety programmes for 1200 employees including two national safety conferences, behavioural safety for managers, design and delivery of an internal NEBOSH General Certificate Course, operational learning initiatives and occupational road risk reduction all resulting in winning the RoSPA Research and Development Sector Award two years running.

Engineering Construction Projects

- Design and delivery of behavioural safety training packages to 2500 construction staff and contractors. Delivery of Health and Safety training on various topics to construction staff and contractors. Design and implementation of the behavioural safety package on the construction sites. Implementation of safety improvement initiatives as part of a team who were successful in winning two HSE Working Well Together Awards.
